REJUVENATING BATHS.

Many women make their bath much too lengthy a function, but the result that not only the skin, but the whole system becomes enervated. The hot bath should be taken quickly, followed by a sponge down or douche of cold or tepid water, and a brisk towel to promote circulation.

After long exercise, or when one is tired, and especially for sufferers from colds, rheumatism or neuralgia, a "mustard bath" is a wonderful tonic; that is so easily prepared, also, and merely dissolves from one to two teaspoonfuls in hot water, and voila! The cold douche is not required after a mustard bath.

Two brushes for use in the bathroom are particularly good. One is the bath tub brush with bristles mounted in a convex form, adapted to the contour of the tub. The handle is long enough to enable one to scour the tub without stooping over.

The other is cleverly contrived to clean the basin of the toilet closet more thoroughly than the usual mop or cloth. The brush is round and has very stiff bristles, but its special ingenuity consists in the spring which attaches it to the handle.

This is of stout wire, bending in any direction, and its pliability permits the brush to reach every part of the basin, even some distance down the turn of the drain. The hands need never come in contact with the water.

Miss Sadie Kopf, 427 W. Madison st., was hostess last evening to members of the Kappa Phi Sigma sorority at the usual business and social meeting. The members enjoyed a social time after the transaction of the business. Light refreshments were served. The club will meet next Thursday evening.

"When tooth brushes are first purchased they should be allowed to stand in cold water overnight before using. This soaking swells the bristles, makes them fit snugly in the openings in the brush and prevents them from falling out.

"Every precaution should be taken in the care of the face is extremely sensitive and if any dirt is allowed to remain in the brush it lodges in the tiny pores of the face. Blemishes result that often require months to heal.

"After thoroughly washing brushes, they should be placed in the sun. After drying thoroughly, put them where dust cannot reach them."

What the French Maid Told Marjorie

BY JANE LOWELL

CAKE OF TOILET BRUSHES.

"Whatever you are doing Marie?" questioned Marjorie as she found her valued friend washing out a brush in an unknown solution.

"Just now I am cleaning a camel's hair complexion brush. Hair brushes should be washed weekly in a quart of warm water into which a teaspoonful of ammonia has been poured, or in which a tablespoonful of borax has been dissolved. The ammonia is preferable, although either of these solutions will keep the brushes in excellent condition removing dirt, grease and germs. After that rinse well in cold water, wipe them and place in the sun to dry.

"The use of a weak solution of alcohol is also good, but when such a solution is used, extreme care should be taken only to dip the brush in the alcohol."
